Panel 1 - Residential Buildings: Technologies, Design, and Performance Analysis

Foreword	1.iii
Acknowledgments	1.v
Introduction	1.xi
Size and Importance of Small Electrical End Uses in Households	1.1
<i>James R. Brodrick, D & R International</i> <i>Robert A. Zogg, Arthur D. Little, Inc.</i> <i>Deborah L. Alberino, Arthur D. Little, Inc.</i>	
Waking the Sleeping Giant: Introducing New Heat Exchanger Technology into the Residential Air-Conditioning Marketplace	1.19
<i>Terry Chapp, Modine Manufacturing Company</i> <i>Mark Voss, Modine Manufacturing Company</i> <i>Charlie Stephens, Oregon Energy Office</i>	
Are Your Ducts All in a Row: Duct Efficiency Testing and Analysis for 150 New Homes in Northern California	1.33
<i>Fred Coito, Xenergy Inc.</i> <i>Geof Syphers, Xenergy Inc.</i> <i>Alex Lekov, Lawrence Berkeley National Laboratory</i> <i>Valerie Richardson, Pacific Gas and Electric Company</i>	
Tested R-value for Straw Bale Walls and Performance Modeling for Straw Bale Homes	1.43
<i>Tav R. Commins, California Energy Commission</i> <i>Nehemiah I. Stone, California Energy Commission</i>	
Mechanical Ventilation in Houses in the Southeast—Doing the Right Thing Not-Quite-Right ...	1.53
<i>Bruce. E. Davis, Advanced Energy Corporation</i>	
Advanced Customer Technology Test for Maximum Energy Efficiency (ACT2) Project: The Final Report	1.6
<i>Lance E. Elberling, Pacific Gas and Electric Company</i> <i>Grant J. Brohard, Pacific Gas and Electric Company</i> <i>Merwin L. Brown, Pacific Northwest National Laboratory</i> <i>Ralph Cavanagh, Natural Resources Defense Council</i> <i>George R. Hernandez, Bentley Engineering Company</i> <i>Amory Lovins, Rocky Mountain Institute</i> <i>Arthur H. Rosenfeld, U.S. Department of Energy</i>	

System Interactions and Energy Savings in a Hot Dry Climate 1.79
Sara Farrar, National Renewable Energy Laboratory
Ed Hancock, National Renewable Energy Laboratory
Ren Anderson, National Renewable Energy Laboratory

Leaking Electricity: Individual Field Measurement of Consumer Electronics 1.93
David B. Floyd, Florida Solar Energy Center
Carrie Webber, Lawrence Berkeley National Laboratory

Modeled vs. Measured Duct Distribution Efficiency in Six Forced-Air Gas-Heated Homes 1.103
Paul W. Francisco, Ecotope, Inc.
Larry Palmiter, Ecotope, Inc.
Bob Davis, Ecotope, Inc.

An Evaluation of Residential Energy Conservation Options Using Side-By-Side Measurements of Two Habitat for Humanity Houses in Houston, Texas 1.115
Jeff Haberl, Texas A & M University
Tarek Bou-Saada, Houston Light & Power
Agami Reddy, Drexel University
Veronica Soebarto, University of Adelaide, Australia

Measured Energy Penalties From Crawl Space Ventilation 1.135
William W. Hill, Center for Energy Research/Education/Service, Ball State University

Evaporative Condensers: The Next Generation in Residential Air Conditioning? 1.147
Marc A. Hoeschele, Davis Energy Group
Mark J. Berman, Davis Energy Group
Lance E. Elberling, Pacific Gas and Electric Company
Marshall B. Hunt, Pacific Gas and Electric Company

Trade-Off Between Cool Roofs and Attic Insulation in New Single-Family Residential Buildings 1.159
Steven Konopacki, Lawrence Berkeley National Laboratory
Hashem Akbari, Lawrence Berkeley National Laboratory
Danny Parker, Florida Solar Energy Center

WHAM: A Simplified Energy Consumption Equation for Water Heaters 1.171
Jim Lutz, Lawrence Berkeley National Laboratory
Camilla Dunham Whitehead, Lawrence Berkeley National Laboratory
Alex Lekov, Lawrence Berkeley National Laboratory
David Winiarski, Pacific Northwest National Laboratory
Greg Rosenquist, Lawrence Berkeley National Laboratory

Reducing Leaking Electricity to 1 Watt 1.185
Alan Meier, Lawrence Berkeley National Laboratory
Wolfgang Huber, Lawrence Berkeley National Laboratory
Karen Rosen, Lawrence Berkeley National Laboratory

Field Adjusted SEER [SEERFA] Residential Buildings: Technologies, Design, and Performance Analysis 1.197
C. Leon Neal, Advanced Energy Corporation

Using CO₂ Concentrations to Predict Energy Consumption in Homes 1.211
Thomas Olofsson, Umea University
Staffan Andersson, Umea University
Ronny Östin, Umea University

Modeled Duct Distribution Efficiency: Insights for Heat Pumps 1.223
Larry Palmiter, Ecotope Inc.
Paul W. Francisco, Ecotope Inc.

Measured Energy Savings of a Comprehensive Retrofit in an Existing Florida Residence 1.235
D.S. Parker, Florida Solar Energy Center
J.R. Sherwin, Florida Solar Energy Center
J.K. Sonne, Florida Solar Energy Center
S.F. Barkaszi, Florida Solar Energy Center
D.B. Floyd, Florida Solar Energy Center
C.R. Withers, Florida Solar Energy Center

Effects of Occupant Control, System Parameters, and Program Measures on Residential Air Conditioner Peak Loads 1.253
George Peterson, Proctor Engineering
John Proctor, Proctor Engineering

Performance of a Reduced Peak kW Air Conditioner at High Temperatures and Typical Field Conditions 1.265
John Proctor, Proctor Engineering

Monitored Ground Source Heat Pump Performance in Northern California 1.275
Leo I. Rainer, Davis Energy Group
Marc A. Hoeschele, Davis Energy Group
Bruce Vincent, Sacramento Municipal Utility District

Ventilation Strategies for Energy-Efficient Production Homes 1.287
Judy A. Roberson, Lawrence Berkeley National Laboratory
Richard E. Brown, Lawrence Berkeley National Laboratory
Jonathan G. Koomey, Lawrence Berkeley National Laboratory
Jeffrey L. Warner, Lawrence Berkeley National Laboratory
Steven E. Greenberg, Lawrence Berkeley National Laboratory

Design/Sizing Methodology and Economic Evaluation of Central-Fan-Integrated Supply Ventilation Systems 1.299
Armin F. Rudd, Florida Solar Energy Center

Miscellaneous Electricity Use in U.S. Homes 1.315
Marla C. Sanchez, Lawrence Berkeley National Laboratory
Jonathan G. Koomey, Lawrence Berkeley National Laboratory
Mithra M. Moezzi, Lawrence Berkeley National Laboratory
Alan Meier, Lawrence Berkeley National Laboratory
Wolfgang Huber, Lawrence Berkeley National Laboratory

Energy-Efficient Torchieres: From the Laboratory to the Marketplace 1.327
Michael Siminovitch, Lawrence Berkeley National Laboratory
Erik Page, Lawrence Berkeley National Laboratory
Debbie Driscoll, Lawrence Berkeley National Laboratory

Measured Ceiling Fan Performance and Usage Patterns: Implications for Efficiency and Comfort Improvement 1.335
J.K. Sonne, Florida Solar Energy Center
D.S. Parker, Florida Solar Energy Center

Energy End-Use in New Zealand Houses 1.343
Albrecht Stoecklein, Building Research Association of New Zealand
Andrew Pollard, Building Research Association of New Zealand
Sarah Bishop, Building Research Association of New Zealand

Fridge of the Future: Designing a One Kilowatt-Hour/Day Domestic Refrigerator-Freezer 1.355
Edward A. Vineyard, Oak Ridge National Laboratory
James R. Sand, Oak Ridge National Laboratory

Saving Tons at the Register 1.367
Iain Walker, Lawrence Berkeley National Laboratory
Jeff Siegel, Lawrence Berkeley National Laboratory
Karl Brown, California Institute for Energy Efficiency
Max Sherman, Lawrence Berkeley National Laboratory

Comparison of CHEERS Energy Use Predictions with Actual Utility Bills 1.385
Bruce A. Wilcox, Berkeley Solar Group
Marshall B. Hunt, Pacific Gas and Electric Company
