

Discussion

- How does / could benchmarking add value to your programs (building and system-level)?
- Does the value change among segments of the commercial buildings market?
- What have been your strategies for addressing the most unique buildings?
- What are the opportunities for / challenges to taking benchmarking to greater scale?

Discussion

- Would your program take steps to increase access to the data required for benchmarking, e.g., automated transfer of energy data into Portfolio Manager?
- Would regulators in your state welcome the inclusion of benchmarking as a program activity?
- Have you found benchmarking needs not met by existing tools?
