The SRLink™ Solution

Basic sensor package includes:

- 10 SRLink™ data gateways
- Non-intrusive load monitoring hardware for 10 electric service panels (12 circuits each)
- Deployment support

Large industrial application

- SRLink™ deployed to monitor over 120 loads in all switchgear of 13 double-ended substations at a ~300,000 sq ft aerospace manufacturing facility
- Enabled identification of a critical voltage imbalance in one substation immediately
- Customer now able to:
 - Take better advantage of utility efficiency program offerings
 - Break out energy use by business unit and quantify energy savings from Kaizen Energy Treasure Hunt events
 - Actively protect health and enhance performance of motors
 - Shift from reactive to proactive maintenance approach

Start practicing smart industrial energy management.
