

ENERGY STAR Industrial Program:

- Voluntary partnership program
- Over 15 years of working with industry
- Over 950 companies engaged
- 30+ sector-specific industry initiatives
- Benchmark industrial energy efficiency
- Provide energy management guidance
- Offer recognition for performance
- www.energystar.gov/industry

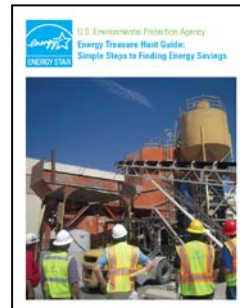

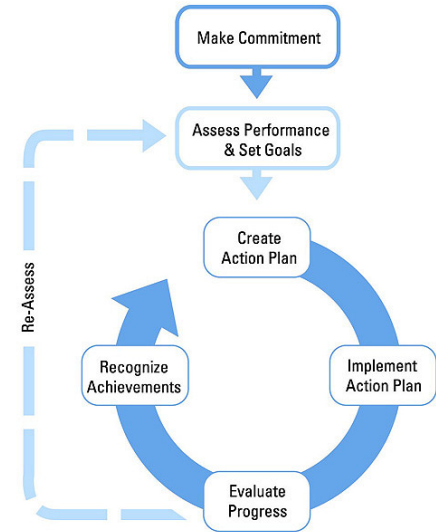

Strategic energy management resources

- Guidelines for Energy Management
- Energy Program Assessment Matrix
- Facility Energy Program Assessment Matrix
- Teaming up to Save Energy
- Energy Treasure Hunt Guidebook
- Energy Performance Indicators (Industrial Plants)
- Portfolio Manager (Commercial Buildings)
- Energy guides

ENERGY STAR Guidelines for Energy Management

ENERGY STAR recognition

Recognition from EPA through ENERGY STAR helps energy programs to motivate teams, develop momentum, and build support.

ENERGY STAR offers three forms of recognition for manufacturers:

ENERGY STAR Partner of the Year

Recognizes world-class corporate energy management programs.

ENERGY STAR Plant Certification

Recognizes plants that score in the top 25 percent on the ENERGY STAR energy performance scale based on use of an ENERGY STAR Plant Energy Performance Indicator.

ENERGY STAR Challenge for Industry

Recognizes sites that reduce their energy intensity by 10%.

Recognition supports SEM adoption

- **420+** plants have Achieved Challenge for Industry
- **100+** plants have Achieved the Challenge more than once.
- **73 trillion+** BTUs in energy saved by Achiever plants.
- **19.7%** average reduction in energy intensity within **2 years**.
