

2018 SUMMER STUDY BUILDINGS: PANEL 14

POSTER DISPLAYS

PANEL LEADERS: **Kristen Parrish**, *Arizona State University*

SESSION TOPICS: This panel leverages various media, including videos, posters, software programs, and other graphical displays, to tell the story of how your work makes energy efficiency easy and enticing. The panel seeks content related to the broad topic of building energy efficiency, in the commercial, industrial, or residential sectors. Panel submissions can address any aspect of the building lifecycle at any scale. The panel encourages submissions with rich visuals and graphics and offers presenters an opportunity to engage with conference attendees in one-on-one or small group discussions, rather than a traditional lecture format.
