- Notes:

 Last updated Mar 24, 2011

 a. "Performance Credit" indicates the tax credit initially available based on the vehicle's performance in the cases in which manufacturer sales volumes have triggered a phase-down of the credit. See www.aceee.org/transportation/hybtaxcred him for more information.

 Description of the credit indicates the eligible credit for purchases made today. This value reflects applicable sales volume-related reductions in credit value.

 C. "Adjusted City MPG" for 2008, 2009, 2010 and 2011 models reflects changes in EPA's fuel economy estimates.

 d. Tax credit amount has been certified by automaker and acknowledged by the Internal Revenue Service.

 C. Criteria for alternative fuel vehicle tax credits are different from criteria for hybrid and deser credits.

 Electric vehicles earn a "technology credit" that is based on battery size. o qualify, a plug-in hybrid must have a battery of at least 4 killwarth-burs, with brigns a credit of \$2,500. Each killowatt-hour of battery above this adds \$417 to the credit, up to a maximum of \$7,500 for light-duty vehicles.
