In October 2019 in Minneapolis, ACEEE will host our tenth National Conference on Energy Efficiency as a Resource, the premier US convening conference on efficiency as a utility system resource. Held every other year since 2001, the “EER Conference” attracts a broad spectrum of energy industry stakeholders including utilities, regulatory commissions, state government, consultants, manufacturers, environmental organizations, consumer groups, and research institutes. It will highlight the latest developments in the design and delivery of customer energy efficiency programs, and in the regulatory mechanisms that help make them possible. Look for a robust discussion of the many issues facing utilities as they acquire and integrate this resource into their planning, operation, and business models.
