

# OutSmart

Smarter Sensors, Better Answers

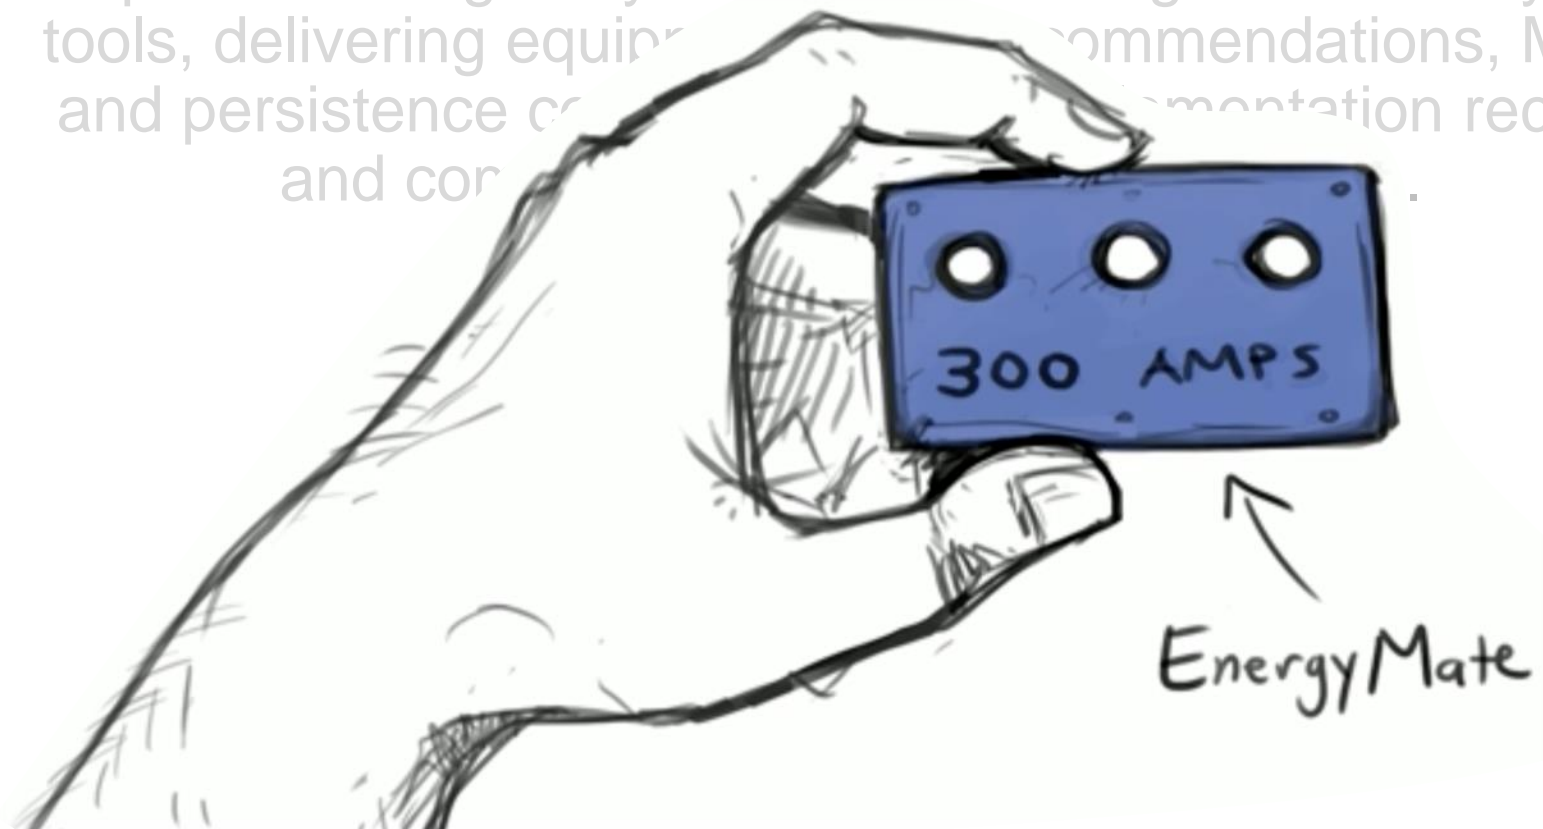

OutSmart has a complete energy optimization platform for C&I buildings using specialized smart micro-meters, software-based analytics, and deep energy domain expertise. We go beyond whole building-based analytics tools, delivering equipment-level recommendations, M&V and persistence compliance. Our implementation record and compelling ROI are proven at scale.

BLAH, BLAH, BLAH.....

OutSmart has a **complete energy optimization platform** for C&I buildings using specialized smart micro-meters, software-based analytics, and deep energy domain expertise. We go beyond whole building-based analytics tools, delivering equipment-level recommendations, M&V and persistence control, and commissioning record and commissioning data.

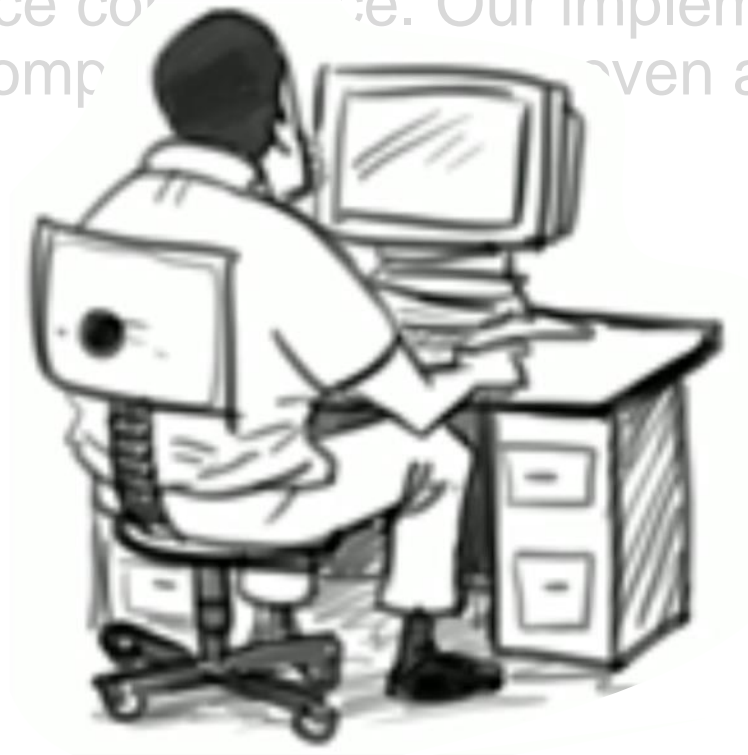

OutSmart has a complete energy optimization platform for C&I buildings using **specialized smart micro-meters**, software-based analytics, and deep energy domain expertise. We go beyond whole building-based analytics tools, delivering equipment recommendations, M&V and persistence of operation record and control.

OutSmart has a complete energy optimization platform for C&I buildings using specialized smart micro-meters, **software-based analytics**, and deep energy domain expertise. We go beyond whole building-based analytics tools, delivering equipment-level recommendations, M&V and persistent operation record

OutSmart has a complete energy optimization platform for C&I buildings using specialized smart micro-meters, software-based analytics, and **deep energy domain expertise**. We go beyond whole building-based analytics tools, delivering equipment-level recommendations, M&V and persistence correction. Our implementation record and comp have been at scale.

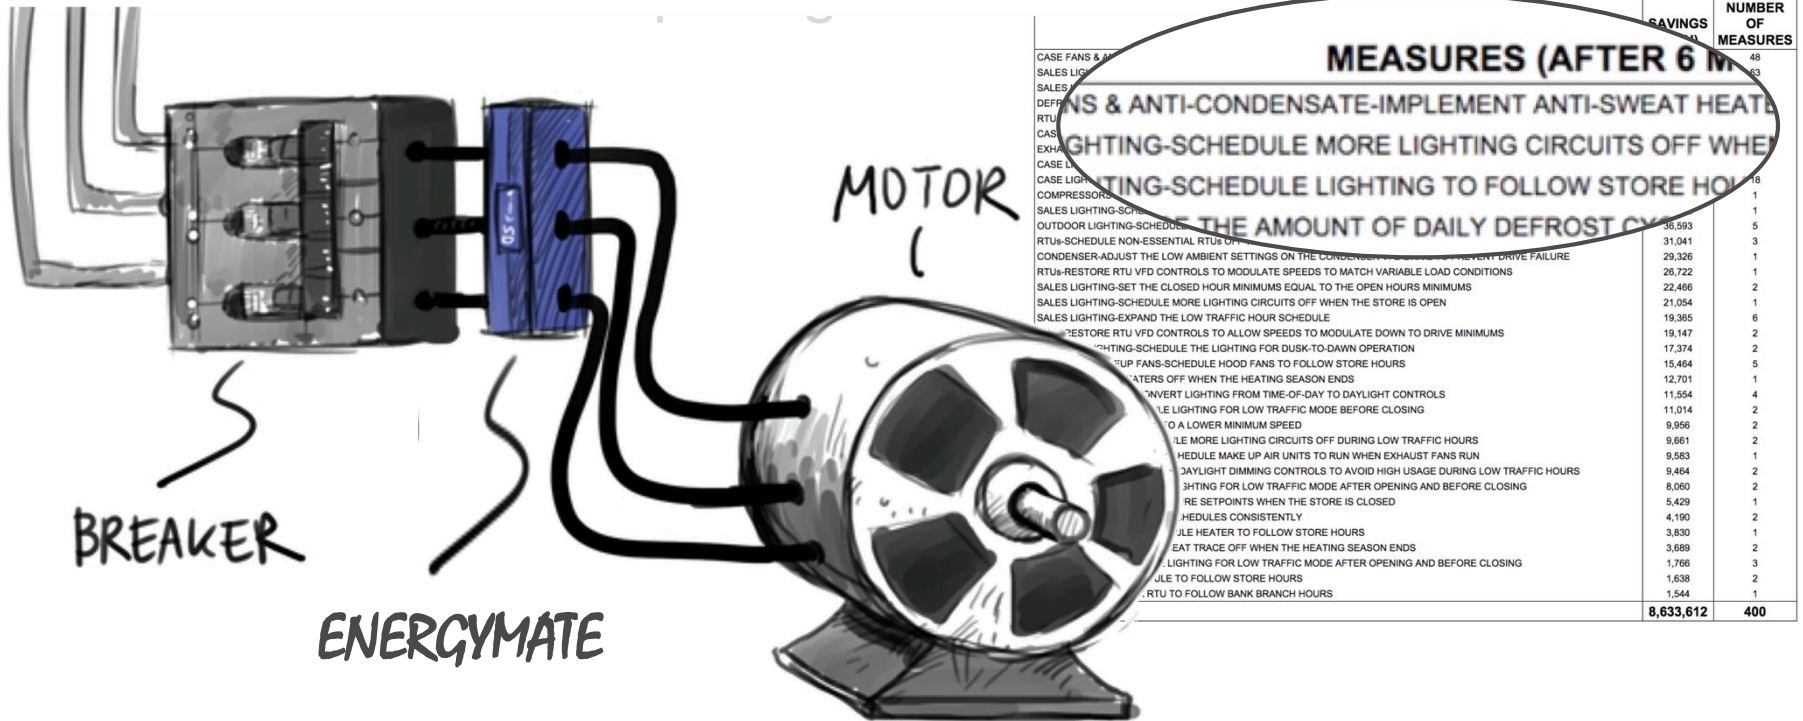

OutSmart has a complete energy optimization platform for C&I buildings using specialized smart micro-meters, software-based analytics, and deep energy domain expertise. We **go beyond whole building-based analytics tools**, delivering equipment-level analytics and performance optimization for M&V

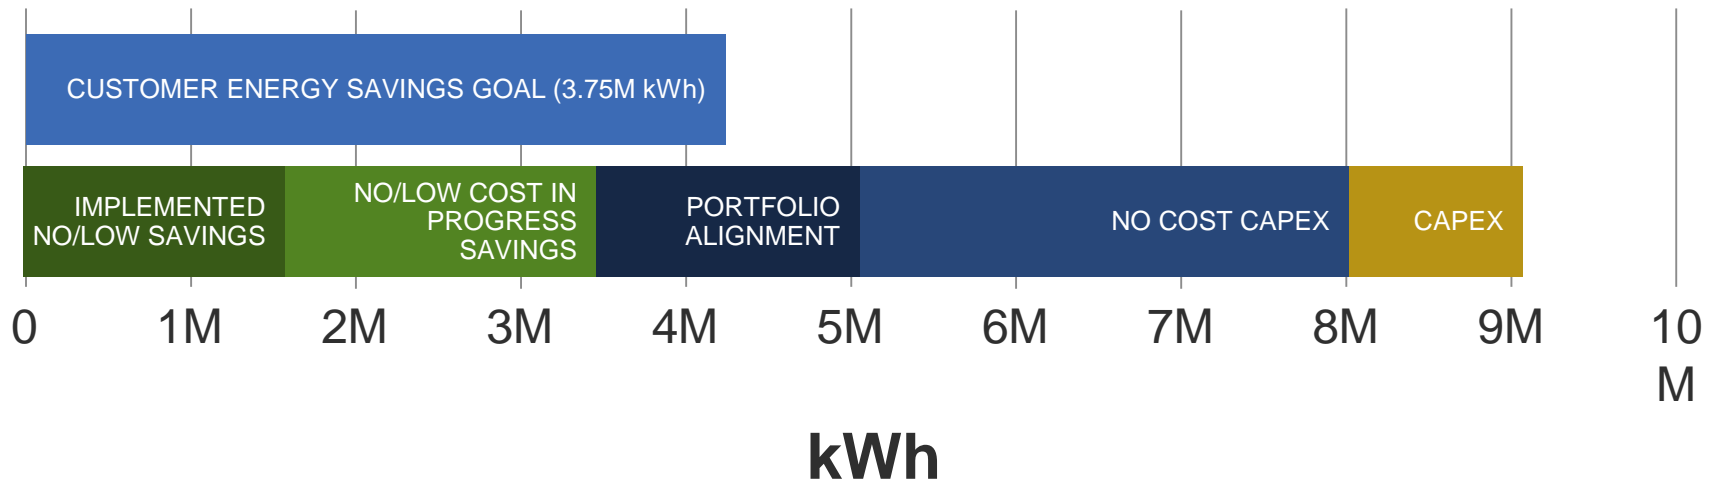

OutSmart has a complete energy optimization platform for C&I buildings using specialized smart micro-meters, software-based analytics, and deep energy domain expertise. We go beyond whole building-based analytics tools, **delivering equipment-level recommendations, M&V and persistence compliance.** Our implementation record and compelling ROI

OutSmart has a complete energy optimization platform for C&I buildings using specialized smart micro-meters, software-based analytics, and deep energy domain expertise. We go beyond whole building-based analytics tools, delivering equipment-level recommendations, M&V and persistence compliance. **Our implementation record and compelling ROI are proven at scale.**
