

**Panel 4**

<p><b>Tuesday, August 13</b></p>	<p><b>Session 1 10:30 am-12 pm Taking Current Processing Technology to the Next Level</b></p>	<p>Zachary Siefker, Purdue University</p>	<p>Energy-Efficient Control of Cooling Tower Water Flow</p>
		<p>Kiran Thirumaran, Oak Ridge National Laboratory</p>	<p>Energy Implications of Electrotechnologies in Industrial Process Heating Systems</p>
		<p>William Becker, National Renewable Energy</p>	<p>Reopt: Enabling Renewable Energy, Storage, and Combined Heat &amp; Power</p>
	<p><b>Session 2 1:30 pm-3 pm Potential for Energy Efficiency and Lessons Learned</b></p>	<p>Ross Lancaster, Strategic Energy Group</p>	<p>Strategic Energy Management Delivery in the Maturing Marketplace: Case Studies and Field Notes</p>
		<p>Sepideh Shahinfard, Cadmus</p>	<p>Evaluating Emerging Energy Efficient Technologies</p>
		<p>Thomas Wenning, Oak Ridge National Laboratory</p>	<p>Innovative Energy Management Strategies and Solutions – What We Learned from Leading Leaders</p>
		<p>Bruce Lung, U.S. Department of Energy</p>	<p>Applying Value at Risk Analysis towards Energy Efficiency Investments</p>
<p><b>Wednesday, August 14</b></p>	<p><b>Session 1 10:30 am-12 pm Consumables</b></p>	<p>Jessica Kramer, Energy Trust of Oregon</p>	<p>Lighting as a Primary Process: Emerging Use of Light Emitting Diodes (LEDs) and Other Technologies for Energy Efficient Indoor Grow Operations</p>
		<p>Micah Sweeney, EPRI</p>	<p>Opportunities for Improving the Efficiency of Craft Breweries through Electrification</p>
		<p>Kimia Yeganeh, CLEAResult</p>	<p>Industrial Energy Efficiency Measures in the Cannabis Industry</p>
	<p><b>Session 2 1:30-3 pm</b></p>	<p align="center"><b>open session</b></p>
